SITE MATRIX

INSURANCE ASSESSMENT & WORKS VALIDATION

Independant, time-stamped, geo-tagged evidence with clear chain of custody, quick capture after catastrophe events, with less over scoping and fewer disputes.

PROBLEM

Incomplete or hard-to-verify information delays claims, creates uncertainty, and leaves insurers exposed.

FIX

Engineered drone data and side-by-side validation provide clear, time-stamped proof of loss and restoration.

> **Clear evidence.**
> **Faster claims.**
> **Defensible outcomes.**
>
> — Site Matrix

WHAT WE INSPECT

Drone Inspections
Safe, rapid, high-resolution aerial data capture

Comparison Reporting
Before vs. after, side-by-side progress and loss analysis

Works Validation
Engineer-verified reports that stand up to scrutiny

AT A GLANCE

1 DAY –
on site, vs 3–4 days of scaffold or EWP survey

100% –
of the visible surface targeted, not a reachable sample

0 –
people working from height

HOW IT WORKS

1. **Record —** Capture before-loss and after-works data with geo-tagged, high-resolution imagery.
2. **Compare —** We align and compare surfaces to quantify damage, scope works, and confirm restoration.
3. **Validate —** Engineer-reviewed reporting you can rely on for claims and close-out.

- RPE Engineer-led / CASA ReOC 9692 / Night Qualified / Radio Qualified Pilots
- $20M public liability
- Thermography Infraspection certified
- IEC TS 62446.3, ISO 6781, NETA MTS.
- National Construction Code

WHO IS IT FOR

Insurers and Loss Adjusters, Asset Owners and Strata Managers, Builders and Remediation contractors

WHAT YOU GET

- ✓ Geo-tagged, prioritised loss & scope register
- ✓ High-resolution and thermal imagery
- ✓ Urgent findings flagged immediately
- ✓ Report in 2–5 business days
- ✓ Your data — you own it

OPTIONAL

Digital 3D twin — a measurable / navigatable 3D photo quality model of your asset to review damage, remediation work repairs and track condition over time.
